When the best plans can't cope with an uncertain situation, how do you insure you can?

Backup's one thing, an important thing, but it's recovery that protects your business from loss and nothing does that better for Microsoft Dynamics™ customers than **ASAP Recover™** Service.

Available in Standard, Enhanced and Premium offerings. **ASAP Recover™** has packages to protect nearly any business from loss of critical data, application access or even time with everything from off-site backup to on-site server imaging to complete failover solutions.

ASAP Recover™ guards against potential catastrophe, 24x7x365. Should your covered server or site ever fail, be assured that you're protected. Not only is your data available but **Engage** also helps you to recover to wherever you choose, including at our own state of the art facilities should you need a place from which to base your restoration.

Your business gets back on its feet faster, protecting you from the costs of data loss and downtime, letting you work through failure instead of being paralyzed by it.

- ✓ Fully redundant power systems at all locations
- ✓ Highly available redundant bandwidth
- ✓ 24x7x365 staffing, security and technical

THE BENEFITS OF UPGRADING

Upgrading to our enhanced or premium package ensures not only the safety of your data, but the continuity of your business operations. Through Virtualization and/or Real-Time replication your applications and services cutover from your failed machine to on-site managed appliances or to servers off-site in Engage's facilities, allowing your people to continue working while the situation is resolved.
